WORK PREFERENCES

Łódź: Any • Warsaw: Hybrid • Remote

LANGUAGES

- **Polish** – native
- **English** – advanced (C1, EF SET)

EDUCATION

2020 – 2022 Lodz University of Technology

MSc Computer Science

spec. Application Frameworks for Java EE Platform
including international student exchanges in
Johannes Kepler Universität Linz

2016 – 2020 Lodz University of Technology

BSc Computer Science

spec. Software Engineering

SOFT SKILLS

- Proactivity & Ownership
- Effective Communication
- Mentoring & Onboarding

INTERESTS

gaming • viola playing • psychology

ABOUT ME

Software Engineer with 7 years of commercial experience in software development, working mainly with Java. Strong background as a fullstack developer working on complex client-server applications in the radiology domain, including redesigning a critical communication module and building rich user interfaces. Experienced Security Champion in a corporate environment, leading pre-release security assessments, static code analysis, vulnerability remediation, and Git release workflows. Focused on end-to-end delivery, code quality, and strong team collaboration.

EXPERIENCE

11.2025 – present (1 year 10 months)

Senior Software Engineer at Visa

Java • Spring • Hibernate • JUnit • Mockito • Maven • Git
Jenkins • Checkmarx • Sonatype • ServiceNow

Security Champion:

- **Vulnerability & Backlog Management:** Analysis of security reports (Checkmarx, Sonatype, ShiftLeft), direct code-level bug fixing, and backlog management.
- **CI/CD & Release Operations:** Automation of Jenkins security scans, implementation of Git branching strategy, and release preparation.
- **Engineering Mentorship:** Educating developers on secure coding, best programming practices, scanning workflows, and branching strategies to proactively prevent vulnerabilities.

ServiceNow:

- **UI Delivery & Technical Advisory:** Implementation of user interfaces via UI Builder and identification of performance bottlenecks, proposing UX and technical fixes to Product Owners.

05.2019 – 10.2025 (5 years 6 months)

Java Fullstack Developer at Pixel Technology

Project: Radiological (DICOM) Image Viewer

Java 17 • JavaFX • RxJava • Spring • Hibernate • Liquibase
PostgreSQL • JUnit • Mockito • Maven • Git • DICOM

- **New Features:** Analysis, domain research, specialist/client consultations, UX design, and full-stack implementation with end-to-end testing.
- **Code maintenance:** Bug fixing focusing on memory, multithreading, and asynchronous performance issues, alongside code refactoring.
- **Team Operations & Culture:** Conducting technical recruitment, employee onboarding, code reviews, task planning, and fostering effective team communication.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
